

Assai DMS

Structured Document Control

Take control over your engineering documentation, from design to handover. Assai DMS is purpose-built for engineering, operations, and compliance teams working in high-risk, asset-intensive industries. Backed by over 30 years of experience, it delivers structured workflows, version traceability, and secure access to critical documentation. This reduces risk, supports compliance, and enables consistent delivery across the asset lifecycle.

About us: Assai delivers AI-powered intelligence for industries, turning fragmented engineering data into a single source of truth. Trusted worldwide, the platform improves search, traceability, and data quality to accelerate decisions, reduce risk, and ensure compliance, helping organizations protect margins and turn complexity into competitive advantage.

What it enables

- Provide a complete audit history in minutes. Be prepared for any inspection.
- Standardise document handovers with preconfigured workflows and approval cycles.
- Control who can access, edit, or release documents with role-based permissions.
- Track every revision and approval in one system. No manual reconciliation needed.
- Keep teams aligned through automated transmittals and structured review cycles.

Integration

Connects with Assai Viewport, Power BI, and external systems via REST API. Designed to integrate across your engineering and operations landscape.

Deployment

Cloud-native, with on-premises deployment available.

Assai DMS is available as a stand-alone solution or as part of Assai Enterprise.

Where Assai proves its value for customers

- Cut document search, review, and rework time by eliminating duplication and enforcing one governed source of truth.
- Standardized engineering control across complex projects, reducing approval cycles and compliance issues at scale.
- Strengthened audit readiness and collaboration by bringing fast-growing portfolios under consistent document control.
